### 1) Dividend Payment Method

The Company plans to pay, in principle, 100% of the distributable income of each fiscal year as dividend in cash. Actual dividend amount will be decided by the resolution of the general meeting of shareholders pursuant to the Commercial Code.

The Company will operate for five years from December 12, 2003 (inception). The ordinary fiscal periods of the Company are from January 1 and July 1 to June 30 and December 31, respectively. However, the first fiscal period of the Company started from December 12, 2003 (inception) and ended on June 2004. If the real estate amounting to 50% or more of total assets of the Company is sold and sale proceeds are completely collected, the fiscal year ends on the date when the sale proceeds are fully collected, after which the disposal profit from the sale will be distributed immediately.

Dividend is paid to the shareholders of the Company who are legally registered in the shareholders registry at the end of each fiscal year. MCO CR-REIT plans to pay dividend within one week from the date of approval by the general meeting of shareholders unless the dividend payment will be made in some other date followed by the decision from general shareholder's meeting.

## 21. Uncertainty of Going Concern

The financial statements of the Company have been prepared, assuming that the Company will continue in operation as going concern over the duration of the Company, defined in the Articles of Incorporation of the Company. Therefore, the Company recorded its transactions based on the assumption that assets and liabilities could be realized or redeemed through ordinary operating activities. However, as of December 31, 2008, current liabilities exceed current assets by ₩ 53,058 million, and the Company is unable to repay the current portion of its long-term borrowings and account payable using its current assets in the ordinary activities due to a subsequent cancellation of a sale and purchase contract of its real property. These matters indicate a material

uncertainty that may cast significant doubts on the Company's capability to continue as a going concern. The Company will plan to early dispose the real property, owned by the Company, or to extend the maturity date of long-term borrowings. Therefore, there is uncertainty that the full payment of long-term borrowings is dependent on the success of disposal of the real property, owned by the Company.

If the Company's plans fail resulting in uncertainty of going concern, its assets and liabilities may not be realized or redeemed as book value through ordinary operating activities. Its financial statements do not include the adjustments about assets, liabilities and income statement items related to classification, which might be brought from this uncertainty of going concern.
