SEC RULE 606 of Regulation NMS Report on Routing of Institutional Customer Orders

Macquarie Capital Markets North America Ltd. (MCMNA) has prepared this report pursuant to U.S. Securities and Exchange Commission Rule 606 of Regulation NMS, which requires all brokerage firms to make publicly available quarterly reports on their order routing practices. The report provides information on the routing of "non-directed orders" - any order that the customer has not specifically instructed to be routed to a particular venue for execution. For these non-directed orders, MCMNA has selected the execution venue on behalf of its customers. For the purpose of the Rule, the term "customer orders" is defined as any orders that are not for the account of a broker-dealer.

The report is divided into three sections: one for securities listed on the New York Stock Exchange, one for securities listed on the American Stock Exchange or regional exchanges and one for securities listed on the NASDAQ Stock Market, Inc. The report does not include exchange-listed options because MCMNA does not trade exchange-listed options. For each section, the report identifies the venue most often selected by MCMNA, sets forth the percentage of various types of orders routed to the venue, and discusses the material aspects of MCMNA's relationship with the venue.
