

Sustainable Finance Disclosure Regulation Statement

Macquarie Capital France S.A. – No consideration of sustainability adverse impacts

January 2025

The EU Sustainable Finance Disclosure Regulation (“SFDR”) requires Macquarie Capital France S.A. including its branches (“MCF”, “we”, “our”) to determine, on a product-by-product basis, whether sustainability risks are relevant to the financial products it advises on.

For the purposes of SFDR, “**sustainability risk**” means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

MCF has determined that sustainability risks are not relevant to the advisory services provided to our clients as we consider that environmental, social or governance events or conditions are unlikely to cause a material negative effect on the transaction subject to our advice, given the limited scope of this service.

Consequently, MCF does not integrate sustainability risks into investment advice for our clients, and MCF has not assessed the likely impacts of sustainability risks on the returns of its clients.
