

Sustainable Finance Disclosure Regulation

Pre-contractual disclosure: Statement that sustainability risks not relevant to financial products

June 2021

The EU Sustainable Finance Disclosure Regulation (“SFDR”) requires Macquarie Capital France S.A. including their branches (“MCF”, “we”, “our”) to determine, on a product-by-product basis, whether sustainability risks are relevant to the financial products it advises on.

For the purposes of SFDR, “**sustainability risk**” means an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

MCF has determined that sustainability risks are not relevant to the advisory services provided to our clients on the basis that in light of the advisory service provided to our clients, we consider that environmental, social or governance events or conditions are unlikely to cause a material negative effect on the transaction subject to our advice, given the limited scope of this service.

Consequently, MCF does not integrate sustainability risks into its investment advice for our clients, and MCF has not assessed the likely impacts of sustainability risks on the returns of our clients.
