

# Macquarie Bank Limited

## **Update**

## **Key Rating Drivers**

Junior Debt Buffers: Macquarie Bank Limited's (MBL) Long-Term Issuer Default Rating (IDR) is above its Viability Rating (VR) to reflect the junior debt buffers built by the bank to address lossabsorbing capacity (LAC) requirements. The bank continues to build its LAC in line with that of Australia's major banks. Fitch Ratings believes the level is sufficient to reduce the risk of taxpayer funds being needed to recapitalise the bank in a resolution, protecting third-party senior creditors.

The VR is in line with the implied VR, underpinned by MBL's sound business and financial profiles. The Stable Outlook on the IDR reflects our view that MBL has sufficient headroom in its financial metrics to maintain its VR, even in a scenario that is moderately weaker than our base case.

Internationally Diversified Operations: We take a blended approach to assign an operating environment (OE) score to MBL, given the scope of its international operation. MBL's score reflects the heavy weighting of its assets and exposures to jurisdictions that we score in the 'aa' OE range. We also factor in MBL's higher exposure to Australian mortgages and high household leverage, resulting in a score at the lower end of the 'aa' category.

Strong Growth in Banking Business: MBL has continued to grow its Australian residential mortgage and deposit market share, to above 6%, and we expect this growth to continue into the medium term. The bank's above-system growth has been concentrated in low-risk mortgages and does not appear to be at the expense of weakening underwriting. Its business model is more diverse relative to domestic peers, but some parts of the business can be more volatile and dependent on market conditions.

Credit Risk Well Managed: The group's centralised risk-management framework and oversight of its subsidiaries through a dedicated risk group have underpinned its strong credit riskmanagement practices, which have resulted in robust financial outcomes over a sustained period. This offsets the group's larger risk appetite than other Australian banking groups.

Impaired Loans Near Peak: We expect MBL's impaired-loan ratio to improve in the financial year ending March 2026 (FY26) as interest rates fall and economic conditions improve. Losses from impaired loans are likely to remain low due to high levels of collateral and adequate provisioning. MBL's asset-quality score of 'a+' is below the implied 'aa' category score as we apply a negative adjustment for its high loan growth. Gross loans have grown by 82% over the last four years, which we believe may understate the impaired-loan ratio.

Diversified Earnings Profile: We expect the diversity of MBL's operations and revenue to continue supporting its sound profitability. We expect a modest increase in profitability in FY26, with pressure on the net interest margin partly offsetting loan and non-interest income growth.

Robust Capital Buffers: We believe MBL's common equity Tier 1 (CET1) ratio, which stood at 12.4% at 1H26, will be maintained above 12% over the long term. Australia's regulator retains a level of conservatism in its application of the final Basel III rules, meaning the CET1 ratio appears modest relative to that of some international peers. We account for this by considering additional metrics to assess MBL's capitalisation.

Sound Liquidity Management: We expect funding and liquidity to remain well managed for the bank over the next 12 months. MBL's factor score of 'a' is consistent with the implied 'a' category score. Its average liquidity coverage ratio was 173% in 2QFY26 and the net stable funding ratio was 113% at end-September 2025.

## **Rating Sensitivities**

#### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

MBL's VR could be downgraded if the OE score were to be revised into the 'a' category from the 'aa' category, as this would probably result in a reassessment of most other factors. This is most likely to occur if there is a sharp and structural decline in Australia's GDP growth or if the bank's exposures skewed away from jurisdictions where we score the OE in the 'aa' range.

The Long-Term IDR would be downgraded if the VR is downgraded or if the regulator no longer envisages MBL's junior debt buffers as sufficient to protect senior creditors in a resolution.

The VR could be downgraded if a combination of the following were to occur:

- the four-year average of the stage 3 loan/gross loan ratio rising above 2.0% for a sustained period (FY22-FY25: 0.9%)
- the four-year average of operating profit/risk-weighted assets (RWAs) declining to below 1.5% for a sustained period (FY22-FY25: 3.1%)
- the CET1 ratio falling below 10% without a credible plan to raise it back above this level (1H26: 12.4%)
- the business profile score is revised down to 'a-', possibly due to a large drop in lending or MBL's deposit market position.

Deterioration or findings of significant deficiencies in MBL's risk-management framework and liquidity management could also pressure the ratings, as this would most likely result in a lower risk-profile score. This could negatively affect our assessment of some financial profile factors.

#### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

Positive momentum in MBL's VR and IDR would require the factor scores for one or more of MBL's business profile, risk profile, and earnings and profitability to be revised to 'a+', from 'a', assuming all other factor scores are unchanged. An upward revision in the score for these factors could be reflected in continued mortgage and deposit market share growth in Australia, a sustained increase in the operating profit/RWA core metric or removal of the regulatory operational risk charge, which is set at AUD500 million.

## **Other Debt and Issuer Ratings**

Rating Level	Rating
Senior unsecured: long term	A+
Senior unsecured: short term	F1
Subordinated: long term	BBB+

#### **Senior Unsecured**

MBL's senior unsecured debt ratings are aligned with the IDRs, in line with our *Bank Rating Criteria*, as Australia does not have statutory senior debt bail-in and therefore there is only one class of senior debt.

#### **Short-Term IDR**

The Short-Term IDR of MBL is at the lower of the two options available at a Long-Term IDR of 'A+' because the 'a' funding and liquidity score is lower than the minimum 'aa-' score to achieve the higher option of 'F1+'.

#### **Tier 2 Instruments**

MBL's subordinated Tier 2 debt is rated two notches below its anchor rating – the VR – for loss severity, with non-performance risk adequately captured by the VR. The point of non-viability for these instruments is at the discretion of the regulator. None of the reasons for alternative notching from the anchor rating, as described in the criteria, are present.

# Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade Short-Term IDR

A downgrade of MBL's Short-Term IDRs would occur if the Long-Term IDRs are downgraded to 'A-' or below and the funding and liquidity score is revised to below 'a'.

#### Senior Unsecured Instruments

MBL's senior unsecured instrument ratings would be downgraded if its IDRs are downgraded.

#### Tier 2 Instruments

The Tier 2 instrument ratings will be downgraded if MBL's VR is downgraded or if any of the reasons for wider notching outlined in our *Bank Rating Criteria* apply, although we view this as unlikely to occur.

## Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade Short-Term IDR

MBL's Short-Term IDRs could be upgraded if the Long-Term IDRs are upgraded to 'AA-', or the funding and liquidity score is revised to 'aa-' or above if there is no change to the Long-Term IDRs.

#### Senior Unsecured Instruments

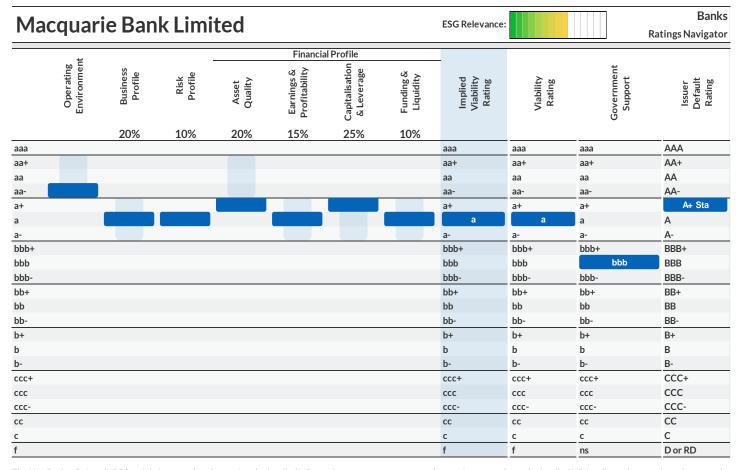

The long-term senior unsecured instrument ratings will be upgraded if MBL's Long-Term IDRs are upgraded.

#### **Tier 2 Instruments**

The Tier 2 instrument ratings will be upgraded if MBL's VR is upgraded or if any of the reasons for narrower notching outlined in our *Bank Rating Criteria* apply, although we view this as unlikely to occur.

## **Ratings Navigator**

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

## **VR - Adjustments to Key Rating Drivers**

The asset-quality score of 'a+' has been assigned below the 'aa' category implied score for the following adjustment reason: underwriting standards and growth (negative). The adjustment for MBL is driven by its strong loan growth. The bank's loan underwriting is sound and has remained consistent.

## **Support Assessment**

Typical D-SIB GSR for sovereign's rating level (assuming high propensity)	a+ to a-
Actual jurisdiction D-SIB GSR	а
Government Support Rating	bbb
Government ability to support D-SIBs	
Sovereign Rating	AAA/ Stable
Size of banking system	Negative
Structure of banking system	Negative
Sovereign financial flexibility (for rating level)	Positive
Government propensity to support D-SIBs	
Resolution legislation	Neutral
Support stance	Neutral
Government propensity to support bank	
	Negative
Systemic importance	
	Neutral

MBL's Government Support Rating (GSR) reflects its rising systemic importance over a number of years, underpinned by its position as Australia's fifth-largest bank by deposit and mortgage market shares, at about 6.5%. We believe there is a high probability of support for MBL by the Australian authorities. We rate MBL's GSR higher than for its domestic non-major bank peers. MBL is also a significant participant in domestic financial markets, and is the only non-major bank that is subject to the Australian government's bank levy.

#### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

MBL's GSR could be downgraded if there is a negative change in our assumptions around the propensity or ability of the Australian authorities to provide timely support. This could stem from a significant decline in MBL's systemic importance but does not appear probable in the medium term. Negative rating action will not directly affect MBL's IDRs, which are driven by its VR.

#### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

An upgrade of MBL's GSR would require a further significant increase in its systemic importance, which would most likely be reflected in an increase in market share closer to the level of the major banks. The GSR may also be upgraded if the Australian authorities provide additional, explicit statements of support for MBL, or otherwise provide greater certainty that support would be provided if needed.

### **Subsidiaries and Affiliates**

### **Core and Integral Subsidiaries**

The Long-Term IDRs of Macquarie Global Finance Pty Limited (MGF, A/Stable) and Macquarie Bank Europe Designated Activity Company (MBE, A/Stable), which are driven by their respective Shareholder Support Ratings (SSRs), are equalised with the VR of their parent, MBL. The SSRs of the entities reflect Fitch's view that, despite their relatively small size, they undertake core operations and functions for the banking group, which increases the propensity of MBL to extend support. If either of the entities were to default, it would have a huge impact on the reputation and franchise of MBL and the wider group.

#### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

A downgrade in the VR of MBL would be reflected in the SSRs and IDRs of MGF and MBE, assuming no change to our assumption around the propensity to support. In addition, a reduction in the role and relevance of these entities to the bank could lead to a downgrade of their SSRs and therefore IDRs.

#### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

An upgrade in the VR of MBL would be reflected in the SSRs and IDRs of MGF and MBE, assuming no change to our assumption around the propensity to support. The SSRs and IDRs may also be upgraded if we believe the entities are likely to benefit from a resolution from the junior debt buffers being built by MBL. This would result in the anchor rating switching to MBL's Long-Term IDR.

#### Criteria Variations

Fitch applied a variation from our *Bank Rating Criteria* by upgrading MBL's Long-Term IDR to one notch above the VR. The criteria states that an uplift can be applied where a banking group's resolution plan envisages that the bank's third-party senior creditors will be protected on a failure by a sufficient volume of qualifying junior debt and equity. We have applied the uplift without access to MBL's plan, as Australia's resolution and LAC framework envisages that senior creditors are protected on a bank failure. We believe this effectively meets the intent of Fitch's criteria.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/topics/esg/products#esg-relevance-scores.

#### SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

#### FORECAST DISCLAIMER FOR FINANCIAL INSTITUTIONS

Any forecast(s) in this report reflect Fitch's forward view on the issuer's financial metrics. They are constructed using a proprietary internal forecasting tool and based on a combination of Fitch's own performance assumptions, macroeconomic forecasts, sector-level outlook and issuer-specific considerations. As a result, Fitch's forecasts may differ materially from the rated entity's forecasts or guidance and may not reflect the assumptions that other market participants may make. To the extent Fitch is aware of material non-public information with respect to future events, such as planned recapitalisations or merger and acquisition activity, Fitch may not reflect these non-public future events in its published forecasts. However, where relevant, such information is considered by Fitch as part of the rating process.

Fitch may update the forecasts in future reports but assumes no responsibility to do so. Original financial statement data for historical periods may be processed by affiliates of Fitch, together with certain outsourcing services. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by its employees.

Fitch's forecasts are one component used by the agency to assign a rating or determine an Outlook. The information in the forecasts reflects material but not exhaustive elements of Fitch's rating assumptions for the issuer's financial performance. It cannot be used to establish a rating, and it should not be relied on for that purpose.

Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch report were involved nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security or a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$1,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its nam

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
