**Important note**

This Target Market Determination (**TMD**) describes the class of consumers that comprise the target market for the Fund, along with the distribution conditions, the review triggers and periods, and certain other information. It forms part of Macquarie Investment Management Australia Limited's design and distribution framework. Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the Fund being consistent with the most recent TMD (unless the distribution is excluded conduct).

### TARGET MARKET SUMMARY

The Fund is designed for consumers who:

- are seeking capital preservation and income distribution
- are intending to use the Fund as a standalone, major allocation, core component, minor allocation or satellite allocation within a portfolio
- have no minimum investment timeframe
- have a low or medium risk/return profile for that portion of their investment portfolio, and
- require the ability to have access within one week of request.

### TMD indicator key

The consumer attributes for which the Fund is likely to be appropriate have been assessed using a red and green rating methodology with appropriate colour coding.

**Consumer attribute definitions**

Consumers should refer to the 'TMD definitions' available at [macquarie.com/mam/tmd](https://macquarie.com/mam/tmd) for the definitions of the consumer attributes (that is, the terms used in the 'Consumer attributes' column in the table below).

**Appropriateness**

The issuer has assessed the Fund and formed the view that the Fund is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described below. The attributes of the Fund in the 'Description of Fund including key attributes' column of the table below are consistent with the corresponding consumer attributes identified with a green rating (in the 'TMD indicator for Fund' column).

## Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (for example, with an intended product use of minor allocation). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may wish to construct a balanced or moderate diversified portfolio with a minor allocation to growth assets. In this case, a product with a high risk/return profile may be consistent with the consumer's objectives for that minor allocation, notwithstanding that the risk/return profile of the consumer, as a whole, is medium. In making this assessment, distributors should consider all features of a product (including its key attributes). Please note that the 'Consumer's intended Fund use', which sets out the percentage of investable assets, is based on **all of the assets** that the consumer has available for investment (excluding the family home) and not, for example, only the relevant portion of assets the consumer is currently intending to invest.
